During his time in New York, Tim has grown to love having a bike with him in the city. With his wife, Amanda, and their 1 year old son, Tim now has a fixie to commute with. New York is a great place for a fixie! The fat-bike boom of the last few years has quickly grown into a movement, and not just the new wave of fatbikes coming out, but also new customers, dealers, and events. More and more people are riding the bikes and starting clubs in towns all over. In March we will be attending The Northfield Fat-Bike Show with the Fat-Bike Club of Northfield Minnesota. Also joining us will be the St. Croix Fat-Bike Club and the Cascade Club of Western Washington, as well as Trek, Specialized, and a whole host of other distributors who will have new models for 2016. Fat-bikes have been around for decades, but lately they've made a comeback in a big way. They are an excellent all around bike, capable of carrying loads, and pushing distances. In the mid-90's Bill Ransom, a local, built a long travel fat-bike that is now known for its versatility. He continued to develop this bike, adding bits and pieces like the VPP suspension and a dropper seatpost. The VPP suspension (Vertical Positioned Pedals) puts the rider's pedaling platform lower and out of the way of the terrain, eliminating dangerous, uphill climbs. The dropper seatpost allows the rider to set the bike to the exact height that is comfortable. The VPP suspension and dropper post allow
