The PeerBlock Windows registry cleaner can be easily run on any PC. Simply plug a USB flash drive or CD/DVD into any computer to start the cleanup process. What is PeerBlock? PeerBlock is a Windows application that blocks unsecured locations in order to prevent these from accessing your system. Also, it protects your private data from getting stolen or altered, in addition to keeping you from having a bad virus/malware issue. PeerBlock's friendly interface makes this tool easy to use, so you can block locations with no problems whatsoever. There is a convenient wizard that will help you set up PeerBlock's registry keys. Also, there are multiple tools that allow you to keep your computer and your data safe. What are the minimum requirements? PeerBlock Windows 10 won't run on computers below these specifications: CPU: Intel Pentium 4 or equivalent RAM: 1 GB or more Hard drive: 10 GB of hard drive space What is this program about? PeerBlock is a very powerful utility. It will prevent remote locations and P2P connections from accessing your system, thus protecting your sensitive data. You will be able to easily modify its settings and program the tool to always run on a system startup. Also, you can import or create custom lists, always allow the computer to connect via port 80 and 443, even if they are blacklisted. What are the features? PeerBlock can be used to block P2P organizations or ads, spyware or educational institutions. Additionally, you can import/create/delete custom lists. The last two will allow you to block access to undesirable locations. What are the benefits? PeerBlock's friendly interface makes this tool easy to use. Moreover, you can always have PeerBlock with you whenever you're on the go. PeerBlock Windows 10 Screenshots: What's New? - Fixed a bug that could cause PeerBlock to quit unexpectedly. - Fixed a bug that could cause PeerBlock to quit unexpectedly. - Fixed a bug that could cause PeerBlock to quit unexpectedly. - Fixed a bug that could cause PeerBlock to quit unexpectedly. - Added more extensive troubleshooting information. - Added a bug reporting feature. - Added a bug reporting feature. - Added a bug reporting feature. - Added a bug reporting feature. - Fixed a bug that could cause PeerBlock to quit unexpectedly. - Fixed a bug that could cause PeerBlock to quit unexpectedly. - Fixed a bug that

- Advanced PeerBlock settings and features: PeerBlock now allows you to customize and edit the list of items to block.
- Customize history: customize how PeerBlock collects and stores the block history and how frequently it checks for updates.
- Easier and faster scanning: PeerBlock no longer prompts the user for individual programs to block. It now scans the entire computer for outdated programs, installed applications, downloads and other operations.
- Log window: PeerBlock has a log window that can be used to view the log file of blocked items.
- Notification system: PeerBlock notifies you of blocked programs, when an update is available.
- Start minimized: PeerBlock can now start minimized to the system tray area.
- Low CPU and system memory usage: PeerBlock uses a small amount of system resources.

This program is freeware, no viruses detected. - The developer has a reputation as one of the best developers and programmers.
