nmRegScrubPro is a scanner, find and clean program designed to aid users in keeping their computers free of invalid and corrupted system registry entries. nmRegScrubPro effectively removes registry entries for programs and services, as well as invalid, missing, disabled, corrupt, or orphaned registry keys that pose a risk to the stability of your system and are generally found in advanced and poorly maintained computers. Because most problematic registry entries are usually unintentional, nmRegScrubPro will not modify existing values or keys. However, when it detects one of these items, it provides instructions to clean the item through Windows Registry Editor. Clean up invalid, missing, disabled, orphaned or corrupt registry entries with this easy to use registry cleaner, and then reboot to get the best results! Includes special enhancements: Work with most windows and Mac OSX programs and configurations Unable to clean invalid or corrupt values Able to extract and clean hidden entries Extract subkeys from regedit (works with Win 7 and Windows 8) Many other improvements! Clean registry entries with the help of our update mechanism and powerful search algorithm! Discover and fix common registry errors! Use this registry cleaner program to keep your PC clean! Advanced Registry Cleaning Protect you and your family from viruses and malware by cleaning the registry. What's New: Version 2.0: Improved compatibility with Windows 8. Added Key Exclusion function. Added Scan Your PC button. Improved syntax and ease of use. Added feature to extract and clean hidden registry keys. Added feature to add entries to the exclusion list. Added feature to specify a path to the Windows regedit program. Added feature to launch a program after a successful scan. Added feature to uninstall if any registry entries have been modified. Added feature to see a list of changes made to the registry. Added feature to roll back a selected entry to an earlier version. Added option to view system files in the order they were added to the system. Fixed a bug where the Registry Cleaner sometimes would not open at startup. Fixed a bug where occasionally the program would run slower. Fixed a bug where sometimes the program would crash when run in Windows 8. Fixed a bug where sometimes the program would crash when run in Windows 7. Fixed a bug where sometimes the program would

What's New in the NmRegScrubPro?
