It has a SQLi mode that lets you run SQL via your http interface. Mast cell mediators and arthritis development. Mast cells are the most abundant inflammatory cells in human synovial tissue. Recent evidence suggests that mast cells can be a source of diverse mediators that can modulate adaptive immune responses as well as innate and adaptive immune mechanisms involved in the pathogenesis of rheumatoid arthritis. Chymase, tryptase, histamine, and lipid mediators generated by mast cells can initiate or modulate processes leading to synovial cell and cartilage damage. The availability of tools to manipulate the activities of mast cells in vivo as well as tools to genetically ablate specific mast cell 6a5afdab4c
