Version 1809 is the first big update since the Windows 10 October 2018 Update. While the update is meant for new PCs, some users with existing Windows 10 Pro and Enterprise PCs have chosen to install it anyway, assuming it would offer no problems. Indeed, version 1809 runs on PCs that have a valid Windows 10 End-of-Service (EoS) version and with all the new features introduced since the Creators Update. But is it a safe upgrade? Microsoft offers the most stable Windows 10 version, but given the importance of Windows as the platform, every time the company releases a new major update,
