## DOMercury Crack

[Download](#)

DOMercury is an open-source cross-platform desktop utility that allows you to search the Internet, specific web pages, find, open, move, copy and delete hard to find files and folders, maximize and minimize system windows, and execute complex scripts with a few

---

simple key strokes. No mouse needed. The DOMercury User Interface: DOMercury's user interface is a unique multi-layer panel with many integrated windows. The main panel, called the X-Window, contains all the buttons, preferences and modules. To the left, there are four separate windows - the Search Panel, the Open Panel,

---

the File Management Panel and the Window Management Panel. Each of these windows can be hidden, moved, resized and grouped together. To the right of the main panel is the X-Mouse Area, which can be moved around the screen to work with all of the integrated windows. The search panel is located to the left of the X-Window. The panel

---

will automatically highlight all instances of a search string in the current file or web page. There is a large list on the left side of the panel with a search bar at the top. A double click or keystroke will enter the search string into the bar. When the mouse is moved over an item in the list, the current page will be shown on the right side. The Open

---

Panel is a window that will automatically pop-up to the left of the search panel when you search the web for a file, URL, bookmark, etc. The Open Panel is where you search for files and folders. You can search by name or location. On the right side of the panel is a tree control that will automatically expand to display the file or folder that you

---

have selected. Double clicking an item will open it in the main window. The File Management Panel is a window that will automatically pop-up to the right of the search panel when you search for a file, URL, bookmark, etc. The File Management Panel is where you move, copy, delete, rename and organize files and folders. To the

---

right of the panel is a tree control that will automatically expand to display the file or folder that you have selected. Double clicking an item will open it in the main window. The Window Management Panel is a window that will automatically pop-up to the right of the search panel when you search for a file, URL, bookmark, etc. The Window

---

Management Panel is where you maximize, move, minimize, close and switch between windows. To

The DOMercury program has been in development for over a decade. The program was designed from the ground up to make your computing experience simple. You can search the internet, specific web pages, find, open, move, copy and delete hard to find files and

---

folders, maximize and minimize system windows, and execute complex scripts with a few simple key strokes. No mouse needed. DOMercury System Requirements: 1. Windows NT, 2000, XP, Vista or 7 2. Internet Explorer 8, Firefox or Chrome 3. Note: can also run without internet connectivity  
DOMercury is a small command-

---

line utility, written in C++ that can perform common, everyday tasks, such as searching, copying, moving, creating, deleting, etc. of files and folders. With DOMercury you will be able to: - Open a wide variety of files and folders - Search the internet for files and folders - Search any number of files on the local disk - Find hard-to-find files and

---

folders - Move files and folders -  
Copy files and folders - Create  
files and folders - Delete files  
and folders - Recursively search  
directories - Watch a progress  
bar while a task is run - Open  
programs - Change the desktop  
wallpaper - Copy files to and  
from remote servers - Browse  
the web - Browse other  
directories - Auto-click on the

---

browser's favorite links -  
Navigate to any web page -  
Search the web - Auto-populate  
file/folder browsing dialogs -  
Auto-complete - Do many other  
things - Browse any number of  
files or directories - If need be,  
run all of these functions in the  
background DOMercury is a  
small command-line utility,  
written in C++ that can perform

---

common, everyday tasks, such as searching, copying, moving, creating, deleting, etc. of files and folders. With DOMercury you will be able to: - Open a wide variety of files and folders - Search the internet for files and folders - Search any number of files on the local disk - Find hard-to-find files and folders - Move files and folders - Copy files and

---

folders - Create files and folders  
- Delete files and folders -  
Recursively search directories -  
Watch a progress bar while a  
task is run - Open programs -  
Change the desktop wallpaper -  
Copy files to and from remote  
servers - Browse

What's New In DOMercury?

---

The DOMercury program was designed to be an extensible utility that goes beyond launching applications. You can search the internet, specific web pages, find, open, move, copy and delete hard to find files and folders, maximize and minimize system windows, and execute complex scripts with a few simple key strokes. No mouse

---

needed. Find and open directory, files and folders on the Internet or save them to disk with one simple button click. Move and copy files using drag and drop. Search the Internet for hard to find web pages and save them to disk for later. Find, open and delete system files and folders. Delete the entire hard disk. Execute complex scripts using

---

the mouse, keyboard, speech synthesis or voice recording. Execute scripts with any text in the clipboard. DOMercury is free to use and you can distribute it to your friends. What's New in Version 1.04 1. I added to options to enable showing of special folders on the taskbar and system tray, search from there, and run the resulting list.

---

2. Some games are now closed and some have been fixed to look as they should. 3. Restart is now required to remove old data from the in memory database.

1.04 User interface enhancements (not major GUI changes, the classic UI is still available). 1.x New features. 1.x New taskbar icons. 1.x New sound and speech configurations.

---

1.x New file opening options. 1.x  
New folder opening options. 1.x  
A dialog to help when trying to  
run scripts with voice  
recognition. 1.x A dialog to help  
when an unexpected exception is  
thrown by one of your scripts.  
1.x Automatically unloads the  
current thread when a thread is  
started. 1.x The number of items  
shown in the DOMercury

---

window is configurable  
(minimum and maximum values  
are configurable). 1.x A dialog to  
help with files opening when  
only a file name is given  
(requires your file association  
configuration to be configured  
correctly). 1.x Support for  
copying files with drag and drop.  
1.x Support for getting the list of  
all running processes with the

---

System Manager. 1.x An option to show the System Manager or to open the command line. 1.x Use the newly added accelerators to access various features (examples are the minimizer, the clipboard or the search). 1.x The tools to search are now integrated into the main window. 1.x The drop folders or drop files actions are now enabled by

---

default. 1.x The file search from the registry is now integrated into the main window. 1.x The sound options can be configured for

---

**System Requirements:**
