Prince George council reported a $7.2 million budget surplus in 2016-17, but auditors say the city didn't show that money was allocated to services. Auditor Karyn Somers says the surplus has gone unused since 2016-17. (Prince George Royalty Association) "I think it's ironic," said Ann French. She's the president of the Prince George Royalty Association, an advocacy group. "We need to have opportunities to provide those services." "If the city of Prince George is going to say to its taxpayers, 'There is nothing to do with your money, except for the police and fire, you should make up your own mind what to do with it,'" said French. Somers says the surplus has been going to community projects, but there has not been any analysis of the impact on service levels. "I know the community thinks that all the money should go to the downtown, for example, or to the hospital," she said. "Well, if you're not going to provide services for your residents 1d6a3396d6

Ligthouse Basic

Lighthouse Basic is a fast web browser, designed for users who just want a simple browsing session to check their email or play games without having to wait too much for the page to load. It features basic tools for those looking for alternative methods of navigating the Internet. Basic Internet Explorer User interface The application provides a stylish menu, with a predominantly orange theme and focused options for a safe and swift session. You can open a stored web page, save a link on the PC in.HTML or.TXT format, send e-mails to your friends, and print out important articles. You can copy, paste or cut parts of text as well as stop and refresh your page. Frequently visited pages can be added to a favorites list for quick access. It loads websites really quick, in a few seconds. However, it takes longer time to play videos. Secure your sessions The program protects your browsing experience using the "SeyCorp" security system, offering a variety of options. "WebSafe" is one of them, defending your PC every time you access a page and warning you if one of them is not trusted or insecure. The encryption mode and the "ErrorSupress" feature can be activated or deactivated. Meanwhile, quick apps can be accessed from the "SeyCorp" menu, such as Gmail client, TextCrypter that helps you to encrypt your messages, and Bat Scanner which allows you to scan batch files for malicious codes. Conclusions To conclude, Lighthouse Basic is a simple-to-use browser, accessible for everyone, designed to offer a fast browsing experience to check messages, chat with your friends, and play games. CPU and RAM usage was minimal. Unfortunately, it doesn't support any types of add-ons as other browsers, a bookmark bar, or search history. On top of that, there is no built-in button to change the background color or customize other settings. The "Enter" key doesn't work for loading web pages, and the only thing you can do is click on the search button, which might be a bit frustrating for those used to the keyboard. Advantages: Lighthouse Basic is a fast web browser, designed for users who just want a simple browsing session to check their email or play games without having to wait

What's New in the?

Simplified browsing tool for everyone. Modified: Date: Rating: Share: Lighthouse 8.10.1 Lighthouse is a fast web browser, designed for users who just want a simple browsing session to check their email or play games without having to wait too much for the page to load. It features basic tools for those looking for alternative methods of navigating the Internet. User interface The application provides a stylish menu, with a predominantly orange theme and focused options for a safe and swift session. You can open a stored web page, save a link on the PC in.HTML or.TXT format, send e-mails to your friends, and print out important articles. You can copy, paste or cut parts of text as well as stop and refresh your page. Frequently visited pages can be added to a favorites list for quick access.
