
Toshiba And Western Digital Readying 128-layer 3D NAND Flash

March 18, 2019 - Toshiba and Western Digital are reported to be preparing 128-layer 3D NAND memory, offering more capacity and better performance. Similar to the SSD market, Toshiba plans to release SSDs, but it is also trying to introduce them as a storage solution. Unlike SSDs, which can accommodate multiple NAND chips, they have a single chip. However, in the future, Toshiba and Western Digital may be able to create 128-layer drives that offer not only higher storage density, but also higher performance.
