In a multicenter study of 100 patients with AIDS or ARC examined on 100 occasions, spinal cord lesions were found in 40% of the cases. The presence of these lesions varied considerably in the different geographic centers. Pathogenic viruses could be identified by differentiating 10 cases in seropositive patients by cytomegalovirus, and three cases in seronegative patients by T cell lymphoma. Occipital and lumbosacral (L2-4) cervico-dorsal lesions predominated,
