Source: Adobe It includes elements from previous versions of Photoshop: Photoshop Elements: Core: Photoshop Elements: Stacks: In Elements you can load Photoshop PSD, PNG, GIF, JPG, TIFF and a number of image formats as shown below. Versions of Photoshop Elements Source: Adobe To open a new document you must choose whether to load a file or import an existing one. You can import any available format. If you open a non-image file or an image file with a non-supported format, Photoshop Elements will ask you whether you want to open the file, or save it. If you open an image file containing a Photoshop version lower than CS3, Elements will ask you whether to open the file or save it. You can save a new file as you normally do or save in a different format to import again later. The lower the file size, the faster it opens, so Elements will load a very large file in seconds. A compatible resolution will be kept for the original file, so you can open an edited file in your editor or editor. You can extract an image into a PSD file as explained below. Editing a picture If you are familiar with Photoshop, you will know that there are two ways to edit a picture: In the Layers panel you have an editing toolbox with tools to make multiple changes in a picture. The tools available are: Shadow, Colorize, Black & White, Smooth, Wrinkles, Pencil, Selection, Crop, Blur, Hue/Saturation, Text, Gradient, Emboss, Spot Healing Brush, Sharpen, Lighting and Smudge. You can also use the Rectangular Selection and the Touch Up Panel. With the Refine Edge command you can resize the image, highlight lines with black and white, smooth out the edges, resize the inner and outer shapes, sharpen the edges, reduce noise, burn the edges, add a vignette effect, remove drop-outs, and add a vignette effect. You can also use the tools in the Select menu. Viewing the Layers panel To look at the layers you can see a preview, zoom in or zoom out as shown in the figure below. Denver Transit Police arrested a woman Monday after she allegedly attacked a Denver Transit Police officer in the Station House Monday morning. The incident happened around 9 a.m. in the rear of the Station House at 720 E. Colfax Ave. The assault allegedly started when the woman approached the officer and asked her if she could give her a ride. The officer, who asked not to be identified, says the woman became angry and started shouting at the officer, who managed to detain the woman after she ran away. The officer called for backup and followed the woman onto RTD property where she threatened and verbally assaulted the officer again. At some point, the officer struck the woman in the upper torso and she fell to the ground, where she continued to try and fight the officer. The officer subdued the woman and took her into custody. The officer suffered minor injuries during the incident, according to police. The 45-year-old woman was arrested for criminal trespassing, resisting arrest, assault, assault on a peace officer and larceny. She was booked in the Denver County Jail. Her bail was set at $11,000.
