camera or webcam using the HTML5 Media Capture API. I am having an issue where the launch window shows up but it doesn't launch the camera. My code looks like this: and my javascript like this: `navigator.mediaDevices.getUserMedia({ video: true }).then(function(stream) { video = document.getElementById('myvideo'); video.oncanplaythrough = function() { is_previewed = true; }; video.src = window.URL.createObjectURL(stream);`
